Nate Dilgard

Cyber Security Analyst @ Morgan Stanley
Mansfield, Massachusetts, United States

Summary

Senior Security Professional with over 15 years of experience in vulnerability management, security operations, and system administration. Proven track record in leading enterprise-scale security initiatives and managing critical infrastructure across cloud and on-premise environments.

Experience

Morgan Stanley
Cyber Security Analyst
February 2019 - Present (7 years 4 months)
Boston, Massachusetts, United States

Vulnerability Management

- Vulnerability scanning using Rapid7 Nexpose, Alert Logic, and Tenable
- AWS Cloud configuration and compliance scanning
- Tracked remediation progress using the Jira ticketing system and meetings with stakeholders
- Analyze vulnerability scan data

SOC

- Log analysis using Alert Logic and Akamai
- Incident response through investigation and implementing solutions

Vulnerability Management Scan Coverage

- Use Splunk to create searches, reports, and dashboards to analyze the state of vulnerability scanning through out the Morgan Stanley environment and its entities
- Work with the Morgan Stanley scanning infrastructure team to ensure scanning accuracy and authentication success for each host in the environments

Acquisition Integration

- Integrate Morgan Stanley acquisitions to the companies vulnerability management system and policies
- Transfer vulnerability scanning from Rapid7 Nexpose to Qualys
- Planned out and designed the Qualys vulnerability scanning implementation for the acquisitions

System Administration

- Patch management using IBM BigFix
- GPO creation and modification
- SSL Certificate management
- PowerShell scripting

Project Management

- Windows patching migration
- SIEM migration
- Vulnerability scanning implementation
